PROJECT

"Online Student Portal Using Web Development".

The Online Student Portal website is basically used to build a program that helps Students and Faculty to find data about school or college-related data and gives permission to the faculty to update attendance, marks, etc. It is easy for students and faculty.

"Online blood bank management system".

The project is about providing information about donors to needy people in that situation when their blood is not available in the blood bank of the required blood group. It basically creates using Java.
